B.C.A. Examination, May-2024

SOFTWARE ENGINEERING

(BCA-403)

Time : 3:00 Hours] *[Maximum Marks : 75*

Note : Attempt *all* the sections as per instructions.

Section-A

(Very Short Answer Type Questions)

Note : Attempt all the five questions. Each question carries 3 marks. Very short answer is required not exceeding 75 words. 3×5=15

1. Write a note on software maintenance. 3
2. Explain advantages and disadvantages of software reuse. 3

P.T.O.

3. Differentiate between functional and non-functional requirements. 3
4. Explain cyclomatic complexity. 3
5. Describe prototype model and its advantages. 3

Section-B

(Short Answer Type Questions)

Note : Attempt any **two** questions out of the following three questions. Each question carries **7½** marks. The words limit is **200** words for each answer. 2×7.5=15

6. Describe system specification. Describe software requirement specification.
7. What are the differences between software design and project planning? Explain it.

8. What do you mean by system testing? Explain any two system testing.

Section-C

(Long Answer Type Questions)

Note : Attempt any three questions out of the following five questions. Each question carries 15 marks. Detailed answer is required. 3×15=45

9. What is software process model? Explain the advantages and disadvantages of spiral and prototyping model.

10. What do you understand by software reliability metrics? Explain the different types of software reliability metrics.

11. Explain different test strategies.

12. Discuss the concept of software maintenance process. Justify the statement "Software maintenance is costlier."

13. Explain the following:

    (i) Quality Assurance

    (ii) Software cost estimation

    (iii) Test Planning

B.C.A. Examination, June-2022

SOFTWARE ENGINEERING

(BCA-403)

Time : Three Hours] *[Maximum Marks : 75*

Note : Attempt **all** the sections as per instructions.

Section-A

(Very Short Answer Type Questions)

Note:- Attempt all the **five** questions. Each questions carries 3 marks. Very short answer is required no exceeding 75 words.

1. What is feasibility study? What are the contents we should contain in the feasibility report? 3

P.T.O.

https://www.ccsustudy.com

2. Differentiate between verification and validation. 3
3. Explain Agile methodology in short. 3
4. Is it possible to estimate software size before coding? Justify your answer with suitable example. 3
5. Compare Development Testing with Regression Testing. 3

Section-B

(Short Answer Type Questions)

Note:- Attempt any **two** questions out of following three questions. Short answer not exceeding 200 words is required. Each questions carries 7½marks.

6. How does "Project Risk" factor affect the spiral model of software development? 7½

https://www.ccsustudy.com

7. What is the difference between SRS document and design document? What are the contents of both the documents? 7½

8. What are the characteristics to be considered for the selection of life cycle model? Explain clearly. 7½

Section-C

(Long answer Type Questions)

Note:- Attempt any **three** questions out of following **five** questions. Each questions carries 15 marks. A detailed answer is required.

9. Define module coupling and explain different types of coupling in detail. 15

10. Describe in detail the complete Software maintenance process. 15

https://www.ccsustudy.com

11. Explain all levels of COCOMO model. Assume that the size of an organic software product has been estimated to be 32,000 lines of code. Determine the effort required to develop the software product and the nominal development time. https://www.ccsustudy.com 15

12. Describe 'Rapid Application Development' (RAD) model in detail. 15

13. (i) What are the limitations of waterfall model? 7½

    (ii) How some of the limitations of waterfall model are overcome by iterative methods? 7½

B.C.A. IVth Semester Examination, May-2019

SOFTWARE ENGINEERING

(BCA-403)

Time : 3 Hrs.] *[M.M. : 75*

Note :– Attempt all the Sections as per instructions.

Section–A

(Very Short Answer Type Questions) 3×5=15

Note :– Attempt all the *five* questions. Each question carries 3 marks. Very short answer is required no exceeding 75 words.

1. Describe the three-phase of the generic view of Software Engineering.
2. What are the differences between waterfall and Prototype models ?

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

3. List various objectives of software Project Planning.
4. What is Soft Process ?
5. Briefly describe Forward Engineering.

Section–B

(Short Answer Type Questions) 7½×2=15

Note :– Attempt any *two* questions out of the following three questions. Each question carries 7½ marks. Short answer is required not exceeding 200 words.

6. Describe various Decomposition Techniques ? Explain COCOMO model with example.
7. What are the various factors associated with cost estimation of project ? Explain cost estimation technique in detail.
8. Differentiate between the top down and the bottom up approach in designing software.

Section–C

(Long Answer Type Questions) 3×15=45

Note :– Attempt any *three* questions out of the following *five* questions. Each question carries 15 marks. Answer is required in detail.

https://www.ccsustudy.com

https://www.ccsustudy.com

9. What is Agile methodology ? Discuss the principle of Agile method.

10. Discuss cyclomatic complexity used to define the complexity of source code.

11. What is software design ? Explain it with the help of principles and concepts.

12. How is the cost of software estimated ? Discuss in detail.

13. What is the role of modularity ? Explain the role of coupling and cohesion in software design.

Software Engineering

(BCA-403)

(New)

Time : Three Hours] *[Maximum Marks : 75*

Note : Attempt questions from all Sections as per instructions.

https://www.ccsustudy.com

https://www.ccsustudy.com

Section-A

(Very Short Answer Questions)

Answer all the *five* questions. Each question carries 3 marks. Very short answer is required. 3×5=15

1. Define Software Engineering.

https://www.ccsustudy.com

https://www.ccsustudy.com

2. What are the various types of software maintenance ?

3. What is software process of software development life cycle (SDLC) ?

4. How do software products age ?

5. What is software requirement specification ?

https://www.ccsustudy.com

Section-B

(Short Answer Questions)

Answer any *two* questions out of the following three questions. Each question carries 7½ marks. Short answer is required. 7½×2=15

6. What are the components of gathering the requirements ?

7. Discuss the importance of Agile Process.

8. Discuss the components of object-oriented design.

https://www.ccsustudy.com

https://www.ccsustudy.com

Section-C

(Detailed Answer Questions)

Answer any *three* questions out of the following five questions. Each question carries 15 marks. Answer is required in detail. 15×3=45

9. Explain software process.

10. Explain the factors considering while deciding the maintenance cost.

11. What is software re-engineering ? Explain its process.

12. What are the CASE tools and their usage in software engineering ? Discuss.

13. Discuss the maintenance activities in detail.

B.C.A. Examination, May 2017

Software Engineering

(BCA-403)

(New)

Time : Three Hours] *[Maximum Marks : 75*

Note : Attempt questions from **all** sections as per instructions.

Section-A

Note : Attempt **all five** questions. 3×5=15

1. Define Software Engineering.
2. How can we derive the size of software product?

P.T.O.

https://www.ccsustudy.com

https://www.ccsustudy.com

3. What is SRS?
4. What are various types of software Maintenance?
5. What is software Metric?

Section-B

Note : Attempt any **two** questions. 7½×2=15

6. Explain the importance of configuration management in software engineering.
7. What is software Re-engineering and why it is required?
8. What are the various elements of data design?

Section-C

Note : Attempt any **three** questions. 3×15=45

9. Explain interative waterfall and spiral model for software life cycle and various activities in each phase.

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

10. Draw and explain the framework for sequential maintenance process activities.

11. How good design helps in efficient implementation?

12. Explain the various building blocks for CASE.

13. Explain the type of Maintenance in details.

B. C. A. Examination, May 2016

Software Engineering

(BCA-403)

(New)

Time : Three Hours] *[Maximum Marks : 75*

Note : Attempt questions from all Sections as per instructions.

Section-A

(Very Short Answer Questions)

Attempt all the *five* questions. Each question carries 3 marks. Very short answer is required not exceeding 75 words. 3×5=15

1. Define Software Engineering.

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

2. What is Software Implementation ?

3. What is Software Maintenance ?

4. Explain design process.

5. Write about software change strategies.

Section-B

(Short Answer Questions)

Attempt any *two* questions out of the following three questions. Each question carries 7½ marks. Short answer is required not exceeding 200 words. 7½×2=15

6. What do you mean by configuration management ?

7. Explain the various software engineering activities.

8. Define perceptive software maintenance.

https://www.ccsustudy.com

https://www.ccsustudy.com

https://www.ccsustudy.com

Section-C

(Detailed Answer Questions)

Attempt any *three* questions out of the following five questions. Each question carries 15 marks. Answer is required in detail. 15×3=45

9. Describe the procedural design technique in software design methodology.

10. Explain the various techniques for the software maintenance.

11. Explain the requirement engineering activities in detail.

12. Give the fundamental design applications related to software engineering.

13. Write some design principles for maintainability.
